

ALONSO PEDRERO MARTÍNEZ

 /AloPedrero  /alonso-pedrero-martinez  pedreromartinezalonso@gmail.com

 Toluca, Edo. de México, México  (+52) 722-431-4626

EDUCATION

Tecnológico de Monterrey (ITESM), México
B.S. in Mechatronic Engineering

Jan 2019 - Jun 2023
GPA: 91

Tecnológico de Monterrey (ITESM), México
M.S. in Applied Artificial Intelligence

Sep 2023 - Currently studying
Current GPA: 94

SKILLS

Programming Languages: Python, TypeScript, Java, SQL
Frameworks & Libraries: React, Next.js, Spring Boot, Pandas, Scikit-learn, NumPy, PySpark, Tailwind CSS
Tools & Platforms: Docker, GitHub, Linux/Unix (Bash, Zsh), AWS, Azure, Google Cloud, Clerk
Spoken languages: Spanish (native), English (advanced)

WORK EXPERIENCE

Data Analyst **PepsiCo** *México City, México — 01/2024 - 02/2026*
- Led the semi-automation of a **\$50K** report using **Alteryx**, consolidating data from **various sources** and **reducing processing time by 600%**. Enabled users to generate reports by simply downloading data and adjusting two variables.
- **Developed the first machine learning project** in Supply Chain at PepsiCo Beverages North America, identifying a **\$31M** opportunity in **waste prediction** and a **\$40M** opportunity in **product coaching recommendations**. Built scalable **Random Forest regression and classification models**, as well as **SVD-based recommendation systems**, with a training and production pipeline capable of handling weekly data ingests across North America.
- Established **documentation and development standards** for change requests, error mitigation, and project tracking. Defined Python **best practices** based on **PEP8, Clean Code, and OOP**, ensuring **scalability, testability, and code reusability**.

Data Scientist, Intern **Daimler** *México City, México — 04/2023 - 01/2024*
- Developed an automated software architecture using **Docker** to streamline the extraction, transformation, and accessibility of **Salesforce** data, reducing data operation time by **90%**. Ensured compliance with migration guidelines while enhancing data workflows.
- Performed in-depth analyzes using **Excel, Power BI, Microsoft SQL Server and Python** to identify critical failures and optimize client satisfaction. Deliver actionable business recommendations through reports and visualizations, fostering cross-department collaboration.

PROJECTS

Calendra App – Full-Stack Scheduling Platform
- **Built a scheduling web app** using React, Next.js 15 and TypeScript with event types and user availability management.
- **Implemented authentication and scheduling logic** with Clerk and server actions, storing data in SQL and deploying on Vercel.

Cloud File Storage API – Full-Stack File Upload System
- **Built a file upload system** using React and Spring Boot 3 with a REST API for file management.
- **Integrated AWS S3 for storage** and containerized the backend with Docker while persisting metadata in SQL.

AWARDS

- Hackathon: First place - "Fun Wellness". (ITESM Toluca Campus, 2022)
- Hackathon: First place - "Virtual Hack N' Jam". (ITESM Toluca Campus, 2020)
- Hackathon: First place - "The world against pollution" (ITESM Toluca Campus, 2019)
- Hackathon: Second place - "Fintech" (ITESM Toluca Campus, 2019)
